The image shows a VS Code editor window with a project named 'app.py'. The Explorer sidebar on the left shows the project structure with files like 'static', 'Logo-Gunadar...', 'script.js', 'style.css', 'templates', and 'index.html'. The main editor area displays the code for 'app.py':

```
1 from flask import Flask, render_template
2
3 app = Flask(__name__)
4 app.debug = True
5
6 @app.route('/')
7 def index():
8     return render_template('index.html')
9
10 if __name__ == '__main__':
11     app.run()
12
```

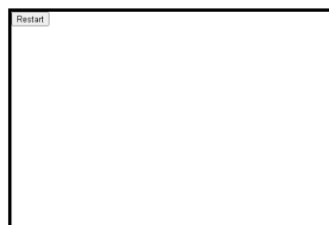

The terminal at the bottom shows the command prompt output:

```
